Addendum No.3

RFP 22-23-042

“Public Safety Software”

Please note the following Questions and Answers:

1.Q: Will the City please provide total numbers for each of the following?

- Total # of mobile CAD licenses needed for Danville Police Department
- Total # of mobile CAD licenses needed for Danville Fire Department (if any)
- Total # of mobile RMS licenses needed for Danville Police Department
- Total # of iOS/Android Phone/Table licenses needed for Danville PD (similar functionality to current Freedom Application)
- Total # of iOS/Android Phone/Table licenses needed for Danville Fire Department (similar functionality to current Freedom Application)
- Does the City desire Data Conversion for any of the following current systems:
 - a. CAD
 - b. RMS
 - c. JMS
 - d. Personnel
 - e. Civil
 - f. Administration

1. A: # of mobile licenses – this was included in Addendum 1 all documents, [Addendum-No-1---22-23-042-Public-Safety-Software \(danvilleva.gov\)](#), see Pre-Bid Meeting Notes. The number of licenses is listed in the matrix, Agency Info. Specific counts would be negotiated during contract negotiations. The number of mobile licenses is a blanket suggestion at this time. This would obviously depend on the type of functionality that would be provided during the demo. I would suggest providing costs based on per license fee or grouped license fees.

Data Conversion - We are specifically interested in the agency's ability to manage/implement a data conversion. At this time, we are not requiring costs. We will discuss data conversion and the amount of data to be converted with the selected vendor and include in contract negotiations, please see RFP, section 4.14 (k)

2. Q: The RFP mentions "conversions" in two places: para 3.9 and 4.14k. However, there's no actual requirement mentioned for data conversion. Is this a requirement, and what is the extent of data that needs to be converted? We need this information for pricing purposes.

2.A: We are specifically interested in the agency's ability to manage/implement a data conversion. At this time, we are not requiring costs. We will discuss data conversion and the amount of data to be converted with the selected vendor and include in contract negotiations

3 Q: Should vendors quote hardware or supply hardware specifications so the agency can procure their hardware?

3. A: Please provide minimum hardware requirements

4. Q: Is JDC (Juvenile Detention Center), Facility Software integrated or is it separate software.

4. A: Separate database but same software.

5. Q: Jail is ADP (Average Daily Population) of 310? What is maximum of beds including JDC, (Juvenile Detention Center)?

5. A: AD – 120 beds, 250 max; Jail – 285 beds, 350 max, JD 60 beds, 60 max
