

# TRASH CAN?

Some think that anything that goes into a storm drain ends up at the wastewater treatment plant or some other waste facility. The fact is that anything that enters a storm drain is discharged back into the environment untreated.

## **Please Be Responsible.**

Don't dispose of waste into a storm drain. Wash your car in the grass to allow wash waters to soak into the ground. Sweep up your driveway and sidewalk instead of washing. Dispose of your grass clippings properly. And never pour anything into a storm drain.

**Remember...*"Only Rain in the Drain"***
